## Vestry Approved Gift List as of April 2026

Parish Hall Audio Video Update \$8,599.29

AV Specialists will deliver, install, and commission the equipment outlined in this proposal. Upon completion of the installation, the client will be provided with a training session on system operation.

AV Specialists will remove all inoperable equipment and any unused wiring from the existing AV rack. A new mixer amplifier will be installed within the rack and integrated with the existing speaker system. **Lab Gruppen CPA1201120W Commercial Mixer Amplifier with 5 Inputs, Bluetooth**

A new wireless microphone system will be provided and installed, consisting of one handheld microphone and one lapel microphone with a bodypack transmitter. **Audio Technica ATW-1423/L2-Channel Digital Wireless System** The antenna will be mounted on the wall outside the AV equipment room. Additionally, AV Specialists will install two hardwired XLR wall plates outside of the AV closet and connect them to the new mixer amplifier to allow for auxiliary audio inputs. **Wirepath WP-XLR-102F-ALU Single Gang Aluminum Dual XLR Wall Plate**

AV Specialists will install a dual HDMI / USB-C video input wall plate to provide audio and video connectivity to the existing ceiling-mounted projector. Audio will be extracted from the projector and routed to the mixer amplifier as a preset source, allowing playback through the existing in-ceiling speakers. A master volume control knob will be installed on the wall outside of the equipment room. Individual source levels, including microphones and projector audio, will be adjustable at the front panel of the mixer amplifier.

A remote power on/off switch with integrated surge protection will be installed for all rack-mounted equipment. This switch will be mounted on the wall outside of the AV room for convenient access.

Complete proposal available upon request.
